

ECOTRAY

ECOTRAY prevents potential leaks from Hydraulic systems dripping onto floors and other internal components. The Skyjack system removes the need for a cumbersome, unsightly “nappy” and is particularly suited for working on sensitive areas, such as decorative flooring, clean rooms and areas where hygiene and concern for chemical contamination are a priority. Unlike other systems that focus on the main hydraulic tray, **ECOTRAY** also protects against leaks from drive motors and steering cylinders.

Skyjack’s **ECOTRAY** has been designed with essential machine functionality in mind.

These essential functions include:

- Pothole protection
- Static strap use
- Access to the emergency stop
- Emergency lowering
- Base controls

SKYJACK
simply reliable

ECOTRAY

KEY FEATURES

- Protects against the whole hydraulic system, not just the main hydraulic tray.
- Avoids cumbersome "nappy" attachment
- Prioritises machine functionality
- Protected from jobsite debris damage, forklift handling, etc.
- Available as a factory fit or field install option (SKYCODED™ specifications only)
- Installed in less than 10 minutes
- Absorbent pads changed in seconds
- **ECOTRAY** label identifies Eco-friendly option fitted
