

PERIMETER LIGHTS

Skyjack's perimeter safety lights for Vertical Masts and DC Scissors project a clearly visible coloured light pattern on the floor which acts as a warning to workers in the vicinity of an active scissor lift.

- Visual indicator for use in environments where ambient noise or hearing protection interrupts the machine's audible alarm
- Identifies a "no go area" that acts as a warning for workers and possible dropped objects from the platform
- Provides a distinct pattern even in well-illuminated areas
- Highlights an approaching machine that is otherwise hidden by obstacles, such as corners, machines etc.
- LED lights minimise battery draw
- Simple installation on all Vertical Masts and DC Scissors* using existing eyelets
- IP67 Rated lights suitable for harsh jobsite environments
- Kit contains lights, brackets, wiring harness and hardware

Please note: Standard lead times may be increased when optional equipment is added, consult factory
Capacities and machine weights may differ when options are added
*Not compatible with dual flashing light option
