

DROPPED OBJECT PROTECTION

Aerial lifts are often used to transport both equipment and workers and it is common for workers to have a variety of tools and equipment in the platform with them. If not secured properly, those items can turn into a hazard as objects dropped from the platform can cause injury.

Skyjack's aluminum mesh option is a rugged passive protection system designed to prevent objects in the platform falling from height. By keeping objects and debris contained within the platform the system reduces the risk of injuries or damage caused by objects falling from working at heights.

- Robust, light weight aluminum mesh design
- Flame-resistant
- Provides visibility and air passage
- Does not interfere with platform entry
- Available as a field install option

COMPATIBLE MODELS

PN# 256159	PN# 220128	PN# 256777
SJ4726/32	SJ30 ARJE	SJ60 AJ+
