#### IMPORTANT

- Machine design complies with ANSI/ITSDF B56.6-2005 stability requirements for rough terrain forklifts.
- Rated capacities shown are with machine on firm level ground, steered straight with frame level and on properly inflated tires.
- Read boom angle and boom extension, then determine allowable load from chart.
  Do not exceed rated loads as dangerous and unstable machine
- conditions will result.

   Always travel with boom retracted in the lowest possible position.
