**TECH TIP**

**MARCH 2026**

**SKYCODED 111: ENTER PINPAD CODE**

Occasionally you will get an issue with a Skyjack Skycoded Electric scissor lift displaying a fault code of **111 PINPAD!** The machine will not operate any functions.

The Skycoded system has the capability of having an optional key card swipe /touchpad for allowing operator access to only authorized personnel. If the batteries on the unit are replaced or were dead for some time, the internal controller default for this option will reset. It is easy to reset this option to OFF using the keypad in the hydraulic tray.

With the unit powered up, Access the hydraulic tray by operating the latch on the front of the tray and swinging it open. You will see the Skycoded display and keypad inside.

Perform the following procedure:

- ✓ Using the keypad, press and hold the ESC button until HELP: PRESS ENTER appears on the screen, but DO NOT PRESS ENTER!
- ✓ Press the RIGHT arrow several times until ACCESS LEVEL 3 appears - press ENTER.
- ✓ Using the UP and RIGHT arrows, enter the code: 1-1-2-2 and press ENTER. ACCESS LEVEL 2 will be displayed.
- ✓ Press the RIGHT arrow until SETUPS is displayed and press ENTER. MACHINE DEFAULTS will be displayed.
- ✓ Use the RIGHT arrow until INTERLOCKS is displayed and press ENTER.
- ✓ Use the RIGHT arrow to display TELEMATICS and press ENTER.
- ✓ LOCKABLE and NORMAL will be displayed.
- ✓ Use the UP or DOWN arrow to highlight NORMAL and press ENTER.
- ✓ Then ESC back to SETUPS and then power OFF and back ON.

The display should show 112:EVERYTHING OK! The unit will return to normal operation.

Anytime you need assistance or information for your Skyjack product, Please access the information available at [www.skyjack.com](http://www.skyjack.com). You can access the Operating, Parts, and Service manuals. We also have excellent animation videos.
