TECHNICAL ANIMATIONS

At Skyjack Product Support, we are always trying to communicate technical information clearly and effectively to the technicians that service our products. We try to use every digital innovation we have and make them available at our website, www.skyjack.com. The latest positive use of technology are the Technical Animations available on our Technical Publications website, <https://techpub.skyjack.com/>.

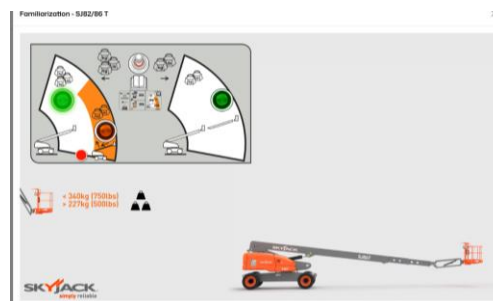

Just type in the serial number or model number and hit  and you will see a page for your model and serial number range with listings for Operation, Service, and Parts manuals; Options and Accessoryzers available for that model and serial number including installation instruction booklets for them. Also a Quick start guide – a pictorial “operator’s manual”, Pre-delivery and inspections forms, and the Technical animations.

Click the Technical Animations button and you will see listings for Service and Maintenance, Product Overview, and Familiarization and Operation.

Open Service and Maintenance, and you will find animations for repair part installation procedures and Accessoryzer installation procedures which enhance the instruction booklets.

Open Product Overview, and access option operation instructions and use.

The Familiarization and Operation animations include a Familiarization for operators, a Service workaround for service tech familiarization, and animations for different procedures. Additional new animations are being made all the time.

The picture above is a typical image seen in the animation for the Skyjack 82/86T boom lifts familiarization video. These are simple, clear, and easy to watch.

Anytime you need technical support for your Skyjack product please contact us at 1-800-2SKYJACK (275-9522), email service@skyjack.com, get information at <https://techpub.skyjack.com/>, or Chat with a service tech using the Chat Bubble  on our website pages.
